

THE DAILY LEGEND.

RAZR AT-S

AT781

**WORKHORSE. WEEKENDER.
THE AT-S IS READY FOR LIFE.**

With an extraordinary combination of on and off road capability, the RAZR AT-S takes life in its stride.

During the weekday the RAZR AT-S is ready for busy days on busy roads, with an adaptive tread design for an assured, comfortable ride. No curb, pothole or downpour can dampen the performance of this hardworking tyre that simply stays so very quiet and gets on with it.

When the work stops, the AT-S becomes a legend, taking the kids to the footy field and on camping adventures in the back blocks. It grips on the road and off it. And it'll last almost as long as the memories of those legendary adventures too.

RBL: Raised Black Letters

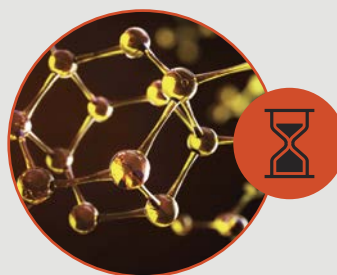

FOR QUIETER DAYS

The RAZR AT-S continues the trademark tough looks of the RAZR family, coupled with a surprisingly silent performance. Maxxis tread pitch arrangement optimisation technology reduces noise generation by dispersing the sound so it never reaches your ears.

FOR SAFER DAYS

Advanced safety features make for a tyre that grips to different road surfaces through good days and bad. There's saw-toothed circumferential grooves for traction, lightning lateral grooves for water dispersal, a semi-continuous centre rib for stability, and reinforced bridges for more even wear.

FOR MORE DAYS

Enjoy extended longevity from a tread compound that features new generation polymers and highly reinforced carbon black nanoparticles to enhance mileage and increase cut and chip resistance.
